Mindful Spending

facilitator kit

1. Mindful Spending: a 90-minute lesson
2. Mindful Spending: a 45-minute lesson
3. Questions to discuss
4. Common problems and what to do
5. The lesson and the Financial Literacy Standard

Mindful Spending: a 90-minute lesson

A 50 / 30 / 20 money plan, practised on a made-up story. For groups aged 15 and over, ideally 8–30 people. Participants work in the Mindful Spending app (Vědomé utrácení) on their own phone, or in pairs on one, and on paper worksheets. A shorter version is in lesson-45-minutes.md.

Amounts are in Czech crowns (Kč), as in the app. The stories are set in Czechia; you can adapt them to your group in words.

What participants take away

After the lesson a participant:

1. splits a monthly income into Need, Fun and Future me, and knows why Future me gets paid at the start of the month;
2. tells fixed, controllable and one-off expenses apart and finds a "leak" among small expenses;
3. sets a goal with an amount and a date and works out how many months it takes;
4. decides where an unexpected expense is paid from and knows what an emergency fund is for;
5. weighs up when borrowing makes sense and when it does not;
6. takes one idea into their own plan, privately; nobody has to show it to anyone.

Which points of the Czech Financial Literacy Standard (Ministry of Finance, 2017) the lesson covers is in the table.

Before you start

- **Try the workshop yourself**: open the link, pick a story and go through the five tasks (about 15 minutes).
- **Phones**: one per participant, or one per pair. Nothing is installed and nobody signs in. The first load needs the internet; after that the workshop also works offline.
- **A projector** with the slides; slide 6 has the QR code.
- **Print** worksheets 1–3 for everyone (or every pair), and worksheet 4 and the questionnaire for everyone. Pens; the phone's calculator is enough.
- The workshop link: **vedome-utraceni.vercel.app/?workshop=1&lang=en** (Czech `lang=cs`; also `pl`, `uk`, `es`).

Ground rules

- **We work with made-up stories.** Nobody has to talk about their own money. Anyone who wants to try their own numbers does so alone, on worksheet 4.
- **Fun is part of the plan.** We do not judge what anyone spends on; we look at what makes sense to whom.
- **The data stay on the phone.** The workshop keeps its own data, apart from the participant's own, and one button deletes them at the end.
- The amounts in the stories are **net income**: what arrives in the account. For a salary, that is the gross pay minus tax and social and health insurance.

Outline

Time	Part	What happens	Materials
0–10	Introduction	a question, the 50 / 30 / 20 rule, ground rules	slides 1–5
10–15	Choosing a story	open the workshop, pick Ema, Tomáš or Lucie	slides 6–7
15–30	1. Split the income	one-tap split, kinds of expenses	worksheet 1, slides 8–9
30–45	2. Find the leak	small expenses per month and per year	worksheet 2, slide 10
45–55	3. Set a goal	amount ÷ monthly = number of months	worksheet 3, slide 11
55–65	4. An unexpected expense	where to pay it from, what a fund is for	worksheet 3, slide 12
65–75	When the plan does not add up	deficit; to borrow or not	slide 13
75–83	5. Looking back and my own plan	Reflection in the app, worksheet 4	worksheet 4, slide 14
83–87	The end	End and delete	slide 15
87–90	Questionnaire	anonymous, on paper	questionnaire

0–10 Introduction

- Ask: "Do you know the feeling at the end of the month of not knowing where the money went?" A raised hand is enough; nobody explains anything.
- The **50 / 30 / 20** rule: half of the income for **Need** (housing, food, transport, phone: what you cannot do without), 30 % for **Fun** (what makes life pleasant: coffee, cinema, subscriptions, gifts), 20 % for **Future me** (an emergency fund, saving for a goal, later also investing).
- It is a starting frame, not a law. When, for example, rent takes more than half of the income, the ratios can be changed in the app (More → Category ratios).
- **Future me first:** whoever pays their future self right after payday does not rely on something being left over.
- Say that the amounts in the stories are net income (see Ground rules), and that the data stay on the phone and are deleted at the end.

10–15 Choosing a story

- Show the QR code (slide 6). Everyone picks one of three made-up stories:
  - **Ema, 19** – a student with a part-time job, lives with her parents, income 11,600 Kč;
  - **Tomáš, 20** – first paycheck, a rented room, income 27,500 Kč;

    - **Lucie, 24** – moving in together with her boyfriend, income 32,000 Kč.
- Make sure all three stories are in the room; it helps when comparing. In pairs: one phone, two heads.

15–30 Task 1: Split the income

- In the app: the **Workshop** tab → task 1 → **Open Overview** → split the income in one tap. Then in **Plan**, break at least one part into real items.
- On **worksheet 1** they write the split in crowns and, for the items already spent, the part of the plan and the kind of expense:
    - **fixed** – the same every month, cannot be changed in the short term (rent, phone, travel pass);
    - **controllable** – you decide how much as you go (coffee, food delivery, shopping);
    - **one-off** – irregular, often unexpected (a repair, a new fridge).
- To check:

Story	Income	Need 50 %	Fun 30 %	Future me 20 %
Ema	11,600 Kč	5,800 Kč	3,480 Kč	2,320 Kč
Tomáš	27,500 Kč	13,750 Kč	8,250 Kč	5,500 Kč
Lucie	32,000 Kč	16,000 Kč	9,600 Kč	6,400 Kč

- Ema lives with her parents: so far she has spent 699 Kč of Need. It is worth asking whether different ratios, for example more for Future me, would make sense for her.
- Questions: What belongs in Need and what already in Fun (a phone yes, but the most expensive plan)? Why pay Future me at the start of the month rather than from what is left? Is Ema's café job a regular income? What if it ended in the summer?

30–45 Task 2: Find the leak

- In the app: **Overview** shows what the money has gone on this month. Which small thing added up the most?
- **Worksheet 2**: the monthly amount × 12 = the cost per year; what else the yearly amount could buy; what could replace the small thing so that the fun stays. Then plan a smaller amount in **Plan**.
- A "leak" is not a bad expense. It is one nobody decided on consciously.
- To check:

Story	Small thing	Per month	Per year
Ema	coffee on the way to class (12 × 65 Kč)	780 Kč	9,360 Kč
Ema	three streaming services	597 Kč	7,164 Kč
Tomáš	food delivery (6 × 290 Kč)	1,740 Kč	20,880 Kč
Tomáš	little online buys	1,150 Kč	13,800 Kč
Lucie	dinners out (4 × 450 Kč)	1,800 Kč	21,600 Kč
Lucie	music, video and cloud subscriptions	657 Kč	7,884 Kč

- Questions: What would the small thing cost in a year? What could replace it so that the fun stays? Which subscription would be missed least?

45–55 Task 3: Set a goal

- In the app: **Goals** → add the story's goal: Ema a driving licence, Tomáš a three-month cushion, Lucie a holiday together.
- The story does not set the target amount; the pair or the group estimates it. Tomáš works his out: three months of necessary expenses.
- **Worksheet 3**: target amount ÷ monthly for Future me = number of months (round up). Monthly for Future me: Ema 2,320 Kč, Tomáš 5,500 Kč, Lucie 6,400 Kč.
- Example: Tomáš, 3 × 13,750 Kč = 41,250 Kč; 41,250 ÷ 5,500 = 7.5, so **8 months**.
- Questions: What happens when a goal has no amount and no date? What could hold the person up on the way, and how can it be prevented?

55–65 Task 4: An unexpected expense

- Announce it to everyone at once: "Something unexpected has happened." Each story has its own surprise: **Ema** a cracked phone screen, 2,490 Kč; **Tomáš** a bike repair after a fall, 1,800 Kč; **Lucie** half a new fridge, 4,500 Kč.
- In the app: task 4 → **Add expense** (it is filled in). Which part of the plan will pay for it, and what will then be short of money? They write it on **worksheet 3**.
- To check what is left of Need: Ema 5,800 − 699 − 2,490 = **2,611 Kč**; Tomáš 13,750 − 11,900 − 1,800 = **50 Kč**; Lucie 16,000 − 11,700 − 4,500 = **−200 Kč**: she is 200 Kč short and has to take it from Fun or from her emergency fund.
- An **emergency fund** is money set aside for exactly such moments. A common recommendation is to keep several months of necessary expenses in it (three to six).
- Questions: Which part did you pay it from, and what was then short of money? How big a fund would cover a surprise like this?

65–75 When the plan does not add up

- A budget is **balanced** when expenses equal income, in **surplus** when something is left over, and in **deficit** when expenses are higher than income. There are four ways out of a deficit: spend less, earn more (a part-time job, selling things you do not need), postpone the expense, or borrow.
- In pairs they decide on four situations (slide 13): borrow – yes, no, or what does it depend on?
  1. A new phone in instalments, because the old one is slow.
  2. Repairing a fridge you cannot cook without, when the emergency fund is not enough.
  3. A holiday on a credit card.
  4. A loan to pay off another loan you cannot keep up with.
- Criteria to discuss: Is it a need or a want? Can I make the repayments from the plan, even in a worse month? How much extra will I pay? Offers are compared by the **APRC** (in Czech RPSN), which includes the interest and the fees. What if my income drops?
- Notes for you: (1) rather not: it is Fun – postpone it and save up; (2) can make sense when the expense is necessary, the loan as cheap as possible and the repayments fit the plan; (3) spending

on Fun with borrowed money is risky; (4) a warning sign: debts are starting to pile up and it is time to get help.
- If someone starts talking about their own debts, offer to talk after the lesson and point to free debt advice. In Czechia, for example, Poradna při finanční tísni (financnitisen.cz, free helpline 800 722 722).

75–83 Task 5: Looking back and my own plan

- In the app: **Reflection** → answer the questions as the person in the story. In pairs: What could be done differently next month? What will you take into your own plan? Then two or three thoughts aloud for the whole group.
- Everyone fills in **worksheet 4** for themselves and keeps it. Nothing is handed in.

83–87 The end

- Everyone taps **End and delete** (at the bottom of the Workshop tab or in More). On shared devices, always. The participants' own data in that browser stay as they were.
- Anyone who wants to use the app for real opens **vedome-utraceni.vercel.app** without the workshop link. Their data stay only in their browser.

87–90 Questionnaire

- Hand out the questionnaire. It is anonymous and nobody signs it; collect it in an envelope or a box.

Optional: Future me and compound interest (5 minutes)

When the group asks about investing, show the **Tips** tab on the projector from your own app, with its compound-interest calculator: a monthly deposit, a number of years and a return of 6, 8 or 10 % a year; the chart separates the money put in from the gains. In the workshop the Workshop tab takes the place of Tips, so show it from your own app. Stress that the return is not guaranteed, investing carries risk, and the calculator is an illustration, not a recommendation.

Appendix: the stories on paper

The same details as in the app (made up, amounts illustrative). Useful when phones do not work or there are too few of them.

Ema, 19 – a student with a part-time job. She is in her first year at university and works in a café at weekends. She lives with her parents, so she pays neither rent nor food at home, but she does pay for her phone, travel and fun.

Income	Kč	Spent this month	Kč	Part
Café job	9,600	Phone	399	Need
Pocket money from parents	2,000	Monthly travel pass	300	Need
		Coffee on the way to class (12×)	780	Fun
		Three streaming services	597	Fun

Goal: a driving licence. Unexpected expense: a cracked phone screen, 2,490 Kč.

Tomáš, 20 – first paycheck. After finishing school he started his first job. He rents a room and is paying for everything himself for the first time.

Income	Kč	Spent this month	Kč	Part
Pay	27,500	Room rent	9,500	Need
		Food shopping	2,400	Need
		Food delivery (6×)	1,740	Fun
		Little online buys	1,150	Fun

Goal: a three-month cushion. Unexpected expense: a bike repair after a fall, 1,800 Kč.

Lucie, 24 – moving in together. She and her boyfriend have rented their first flat. They split rent, utilities and shopping in half; each keeps their own money.

Income	Kč	Spent this month	Kč	Part
Pay	32,000	Half the rent	8,500	Need
		Shared shopping (her share)	3,200	Need
		Dinners out (4×)	1,800	Fun
		Music, video and cloud subscriptions	657	Fun

Goal: a holiday together. Unexpected expense: half a new fridge, 4,500 Kč.

Licence

Mindful Spending: a 45-minute lesson

A shorter version of the 90-minute lesson for a single class period. The timing matches the one in the app (Workshop → For the facilitator). Preparation, ground rules, the numbers to check and the questions are the same as in the longer version; this page lists only what is done differently.

What is left out

- the part **When the plan does not add up** (deficit and borrowing): it can be set as homework or used in a following lesson;
- worksheet 2: the leak is worked out aloud (the monthly amount × 12);
- worksheet 4 and the questionnaire are handed out at the end to take home, or two minutes are taken from looking back for them.

Outline

Time	Part	What happens	Materials
0–5	Introduction and choosing a story	the 50 / 30 / 20 rule, the QR code, pick Ema, Tomáš or Lucie	slides 1–7
5–13	1. Split the income	one-tap split, the first plan items, kinds of expenses	worksheet 1, slides 8–9
13–21	2. Find the leak	which small thing added up most and what it costs in a year	slide 10
21–28	3. Set a goal	how much and how long	worksheet 3, slide 11
28–35	4. An unexpected expense	announce it to everyone at once; where to pay it from, what a fund is for	worksheet 3, slide 12
35–42	5. Looking back	Reflection in the app, in pairs, then briefly as a group	slide 14
42–45	The end	everyone taps End and delete	slide 15

Remember

- Keep the introduction short: the three parts of the plan, "Future me first", made-up stories and data that stay on the phone. Slides 3–5 can be shown without much comment.
- In task 4, announce the unexpected expense **to everyone at once**: Ema 2,490 Kč, Tomáš 1,800 Kč, Lucie 4,500 Kč. Lucie's does not fit into Need (she is 200 Kč short), which is a good way into talking about an emergency fund.
- Leave the last three minutes for End and delete. On shared devices, always.

Questions to discuss

Questions for each part of the lesson. Ask them in pairs first, then let two or three pairs say what they found. The talk is about the people in the stories, not about the participants' own money.

Introduction

- Do you know the feeling at the end of the month of not knowing where the money went?
- What are the things you cannot do without? And what are the things that make life more pleasant?

1. Split the income

- What belongs in Need and what already in Fun? Is a phone a need? And the most expensive plan?
- Why pay Future me at the start of the month rather than from what is left?
- Ema lives with her parents and has spent little of Need so far. Should her ratios differ from Tomáš's? How?
- Which of the person's expenses is fixed, which controllable and which one-off? Why does it matter?
- Is Ema's café job a regular income? What if it ended in the summer? Which income is regular, which irregular and which one-off?

2. Find the leak

- What would the small thing cost in a year?
- What could replace it so that the fun stays?
- Is every small thing a leak? When is it fun someone chooses on purpose?
- Which subscription would the person miss least?

3. Set a goal

- What happens when a goal has no amount and no date?
- How many months will the person need? What would change with 500 Kč a month more?
- What could hold them up on the way, and how can it be prevented?

4. An unexpected expense

- Which part did you pay it from, and what was then short of money?
- How big an emergency fund would cover a surprise like this?
- Lucie's expense did not fit into Need. What now? Where would it be most sensible to take the money from?

When the plan does not add up

- How can a deficit be solved other than by borrowing?
- Borrow: yes, no, or what does it depend on? (the four situations on slide 13)
- How do I know I can afford the repayments?
- Why are loan offers compared by the APRC (RPSN) and not just by the monthly repayment?

5. Looking back

- What could the person do differently next month?
- What from the story also applies to you?
- What will you take into your own plan? (Answered only to yourself, on worksheet 4.)

To close

- What surprised you today?
- How will your next purchase that is not a need be different?

Common problems and what to do

Someone has no phone or no data. Work in pairs or threes. Have everyone open the link at the very start, while Wi-Fi is available: after the first load the workshop also works offline. The lesson can also run entirely on paper: show slide 7; the stories' details are in the appendix of the lesson, and the sums are done on the worksheets.

The link opens the app without the workshop. The workshop is recognised by `?workshop=1` in the address. Have participants scan the QR code or type the whole link and open it in the browser. The workshop keeps its own data, so it neither reads nor changes a participant's own plan in the same browser.

The app is in another language. The workshop welcome has language buttons. A link with `lang=en` opens English, `lang=cs` Czech.

Shared tablets or computers. Always End and delete at the end, or the next group will see a story already started. Before the next group, check that every device starts on the workshop welcome.

Someone wants to enter their own numbers. Not in the group. At home they open vedome-utraceni.vercel.app without the workshop link; their data stay only in their browser, are never sent anywhere, and the app can be locked with a PIN. In the lesson, worksheet 4 is enough.

50 / 30 / 20 does not fit reality. It is a starting frame. When, for example, rent takes more than half of the income, the ratios can be changed under More → Category ratios. Ask what the person would change and why.

Participants feel uncomfortable talking about money. That is why the lesson uses made-up stories. Nobody says their own numbers, and worksheet 4 is not handed in. Do not judge what anyone spends on: Fun is a full part of the plan.

Someone mentions their own debts or enforcement proceedings. Do not deal with it in front of the group. Offer to talk after the lesson and point to free debt advice. In Czechia, for example, Poradna při finanční tísni (financnitisen.cz, free helpline 800 722 722); Člověk v tísni also runs debt advice (clovekvtisni.cz).

Time runs short. Tasks 1, 3 and 4 come first. The leak can be worked out aloud, and looking back cut to one question. Never skip End and delete.

Someone finishes early. Let them change the category ratios and see what happens to the goal; or work out how much sooner the goal would be reached with 500 Kč a month more; or go through another story.

Questions about investing. Show the optional part "Future me and compound interest" (in the lesson) from your own app. The return is not guaranteed and the calculator is not a recommendation.

The workshop stayed on a participant's phone. No harm done: the data are only in their browser and never mix with their own plan. It is still good to delete it: More → End and delete.

The lesson and the Financial Literacy Standard

Which points of the Czech Financial Literacy Standard (*Standard finanční gramotnosti*) the lesson covers. The Standard was published by the Czech Ministry of Finance on 20 July 2017 (a revision agreed by the Working Group for Financial Education); it sets the target level of financial literacy for pupils of primary and secondary schools. Full text, in Czech: PSFV_2017_Standard-financni-gramotnosti.pdf, read on 11 November 2026.

How to read the table

- The **code** is the area (A shopping and paying, B household management, C household budget surplus, D household budget deficit), the level (1.1 primary school, years 1–5; 1.2 primary school, years 6–9; 2 secondary school) and the number or letter of the point in the Standard. The Czech text is quoted word for word; the English translation is ours, not an official one.
- According to the Standard, each higher level includes all the areas of the lower levels, so the primary-school points also apply to secondary school.
- **yes** – the lesson practises the point in an activity; **partly** – the lesson touches the point without covering all of it; **optional** – only in the optional part; **no** – missing from this version of the lesson.

Points the lesson covers

Code	The point in the Standard (Czech original · our translation)	Where in the lesson	90 min	45 min
B 1.1 / 1	porovná své potřeby a přání s finančními možnostmi · compares their needs and wishes with their financial means	task 1: Need and Fun within the income	yes	yes
B 1.1 / 2	sestaví jednoduchý rozpočet a v příkladu rozliší vyrovnaný, přebytkový a schodkový rozpočet · draws up a simple budget and, in an example, tells a balanced, surplus and deficit budget apart	task 1 (the story's budget), task 4 (Lucie's Need goes into deficit), When the plan does not add up	yes	partly
B 1.1 / 3	uvede příklady zvýšení příjmů a snížení výdajů · gives examples of raising income and cutting expenses	task 2 (cutting small expenses), When the plan does not add up (earning more)	yes	partly
B 1.2 / 1 a)	sestaví rozpočet jednotlivce i domácnosti · draws up the budget of an individual and of a household	task 1; household costs only in Lucie's story, which she shares with her boyfriend	partly	partly
B 1.2 / 1 b)	odliší čistý a hrubý příjem · tells net and gross income apart	introduction and slide 5: the amounts are net income	partly	partly
B 1.2 / 1 c)	odliší pravidelné, nepravidelné a jednorázové příjmy · tells regular, irregular and one-off income apart	task 1: whether Ema's café job is a regular income	partly	partly
B 1.2 / 1 d)	odliší pevné, kontrolovatelné a jednorázové výdaje · tells fixed, controllable and one-off expenses apart	task 1 (worksheet 1, slide 9), task 4	yes	yes
B 1.2 / 1 e)	zváží nezbytnost výdajů · weighs up whether expenses are necessary	task 1 (Need or Fun), task 2	yes	yes
B 1.2 / 3 b)	provádí výpočty jednoduchého úročení a popíše princip složeného úročení · calculates simple interest and describes the principle of compound interest	optional part: the compound-interest calculator	optional	no
B 1.2 / 4 a)	stanoví své krátkodobé a dlouhodobé finanční cíle a rozhodne o způsobu dosažení těchto cílů · sets their short- and long-term financial goals and decides how to reach them	task 3 (the story's goal), worksheet 4 (own goal)	yes	partly
B 1.2 / 4 b)	určí rizika ohrožující dosažení finančních cílů a navrhne způsob jejich zmírnění · identifies risks to reaching financial goals and proposes how to reduce them	task 3 (what could hold them up), task 4 (unexpected expense, emergency fund)	yes	yes
C 1.1 / 1	vysvětlí proč spořit · explains why to save	introduction (Future me first), tasks 3 and 4	yes	yes

Code	The point in the Standard (Czech original · our translation)	Where in the lesson	90 min	45 min
C 1.1 / 2	uvede příklady jak spořit · gives examples of how to save	Future me right after payday, an emergency fund, saving for a goal	yes	yes
C 1.2 / 1	odliší spotřebu, úspory a investice a jejich využití · tells consumption, savings and investments and their uses apart	Need and Fun (consumption) against Future me (savings); investments only in the optional part	partly	partly
C 1.2 / 2	v příkladu navrhne řešení přebytku rozpočtu · proposes, in an example, what to do with a budget surplus	task 1: Ema spent little of Need – different ratios, more for Future me	partly	partly
C 2 / 1 b)	vypočte jak dlouho spořit na určitý účel · works out how long to save for a purpose	task 3, worksheet 3	yes	yes
D 1.1 / 1	objasní vznik dluhů a nutnost jejich placení · explains how debts arise and why they must be paid	When the plan does not add up	partly	no
D 1.1 / 2	objasní rizika půjček a vysvětlí, v jakém případě je vhodné si půjčit · explains the risks of loans and when borrowing is appropriate	When the plan does not add up: four situations and criteria	yes	no
D 1.2 / 1	navrhne řešení schodku rozpočtu domácnosti · proposes how to deal with a household budget deficit	task 4 (Lucie), When the plan does not add up	yes	partly
D 1.2 / 2 a)	rozhodne, v jaké situaci je vhodné a nevhodné si půjčit · decides in which situations it is and is not appropriate to borrow	When the plan does not add up: four situations	yes	no
D 1.2 / 3 d)	vysvětlí jak se vyvarovat předlužení · explains how to avoid over-indebtedness	situation 4 (a loan to pay off another loan) and the criteria	partly	no
D 2 / 1 a)	vysvětlí způsoby stanovení úrokových sazeb a využití RPSN · explains how interest rates are set and how the APRC (RPSN) is used	the APRC as the measure for comparing offers	partly	no

Expected attitudes and behaviour

Part 5 of the Standard also describes the attitudes and behaviour financial education should lead to. The lesson supports these:

Point	In the Standard (Czech original · our translation)	Where in the lesson
b)	řeší finanční problémy včas · deals with financial problems in time	task 4, When the plan does not add up, the pointer to free debt advice
c)	má přehled o svých výdajích a příjmech · keeps track of their expenses and income	tasks 1 and 2
d)	žije úměrně svým finančním možnostem · lives within their financial means	task 1, When the plan does not add up
e)	rozumí výhodám (finančního) plánování · understands the benefits of (financial) planning	the whole lesson
f)	vytváří finanční rezervy a řeší včas zabezpečení na dobu, kdy nebude schopen dosahovat příjmů · builds financial reserves and provides in time for when they cannot earn	task 4 (emergency fund); provision for old age is not covered
g)	uchovává důležité doklady a chrání své osobní údaje · keeps important documents and protects their personal data	partly: the data stay on the phone and are deleted at the end; documents are not covered

What the lesson does not cover

- **A Shopping and paying**: how prices are set, complaints, unfair commercial practices, cashless payments and cards, contracts, currency exchange, inflation.
- **B 1.2 / 2** a household's balance of assets and liabilities, and **B 1.2 / 3** financial products, apart from the optional look at compound interest.
- **C** saving and investing in depth, insurance, provision for old age.
- **D** loan offers and kinds of credit, creditworthiness, interest calculations, debt collection, debt relief.

These areas can follow in later lessons; the Mindful Spending app does not support them yet.
