Worksheet 1 · The story's budget

Story (circle one): Ema · Tomáš · Lucie

	Kč per month
Total income	
Need 50 %	
Fun 30 %	
Future me 20 %	

What has the person already spent money on this month? For each item, circle the part of the plan and the kind of expense.

Item	Kč	Part of the plan	Kind of expense
		Need · Fun	fixed · controllable · one-off
		Need · Fun	fixed · controllable · one-off
		Need · Fun	fixed · controllable · one-off
		Need · Fun	fixed · controllable · one-off
		Need · Fun	fixed · controllable · one-off

- A **fixed** expense is the same every month and cannot be changed in the short term (rent, phone).
- A **controllable** expense is one you decide on as you go (coffee, food delivery, shopping).
- A **one-off** expense comes irregularly, often unexpectedly (a repair, a new appliance).

What else would belong in this person's Need but is missing from the story?

Worksheet 2 · Small amounts, big totals

Find the small things in the app that added up over the month. What do they cost in a year?

Small thing	Per month	× 12 = per year	What the yearly amount could buy	What could replace it so the fun stays

The new amount you plan for it in the app:

Before, per month	Now, per month	Saved per year

Is it really a leak, or fun the person chooses on purpose? Why?

Worksheet 3 · A goal and an unexpected expense

The goal

The person's goal	
Target amount	Kč
Monthly for Future me	Kč
Target amount ÷ monthly = number of months (round up)	months

The unexpected expense

What it costs	Kč
Which part of the plan pays for it (circle)	Need · Fun · Future me
What will then be short of money	
How big an emergency fund would cover a surprise like this	Kč
